Outliers Malcolm Gladwell 2008-11-18 From the bestselling author of Blink and The Tipping Point, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

Our Bodies, Their Battlefields Christina Lamb 2020-09-22 From Christina Lamb, the coauthor of the bestselling *I Am Malala* and an award-winning journalist--an essential, groundbreaking examination of how women experience war. In *Our Bodies, Their Battlefields*, longtime intrepid war correspondent Christina Lamb makes us witness to the lives of women in wartime. An award-winning war correspondent for twenty-five years (she's never had a female editor) Lamb reports two wars--the "bang-bang" war and the story of how the people behind the lines live and survive. At the same time, since men usually act as the fighters, women are rarely interviewed about their experience of wartime, other than as grieving widows and mothers, though their experience is markedly different from that of the men involved in battle. Lamb chronicles extraordinary tragedy and challenges in the lives of women in wartime. And none is more devastating than the increase of the use of rape as a weapon of war. Visiting warzones including the Congo, Rwanda, Nigeria, Bosnia, and Iraq, and spending time with the Rohingya fleeing Myanmar, she records the harrowing stories of survivors, from Yazidi girls kept as sex slaves by ISIS fighters and the beekeeper risking his life to rescue them; to the thousands of schoolgirls abducted across northern Nigeria by Boko Haram, to the Congolese gynecologist who stitches up more rape victims than anyone on earth. Told as a journey, and structured by country, *Our Bodies, Their Battlefields* gives these women voice. We have made significant progress in international women's rights, but across the world women are victimized by wartime atrocities that are rarely recorded, much less punished. The first ever prosecution for war rape was in 1997 and there have been remarkably few convictions since, as if rape doesn't matter in the reckoning of war, only killing. Some courageous women in countries around the world are taking things in their own hands, hunting down the war criminals themselves, trying to trap them through Facebook. In this profoundly important book, Christina Lamb shines a light on some of the darkest parts of the human experience--so that we might find a new way forward. *Our Bodies, Their Battlefields* is as inspiring and empowering as is it is urgent, a clarion call for necessary change.

Ten Years a Nomad Matthew Kepnes 2019-07-16 Part memoir and part philosophical look at why we travel, filled with stories of Matt Kepnes' adventures abroad, an exploration of wanderlust and what it truly means to be a nomad. "Matt is possibly the most well-traveled person I know...His knowledge and passion for understanding the world is unrivaled, and never fails to amaze me." --Mark Manson, New York Times bestselling author of *The Subtle Art of Not Giving a F*ck* Ten Years a Nomad is New York Times bestselling author Matt Kepnes' poignant exploration of wanderlust and what it truly means to be a nomad. Part travel memoir and part philosophical look at why we travel, it is filled with aspirational stories of Kepnes' many adventures. New York Times bestselling author of *How to Travel the World on \$50 a Day*, Matthew Kepnes knows what it feels like to get the travel bug. After meeting some travelers on a trip to Thailand in 2005, he realized that living life meant more than simply meeting society's traditional milestones, such as buying a car, paying a mortgage, and moving up the career ladder. Inspired by them, he set off for a year-long trip around the world before he started his career. He finally came home after ten years. Over 500,000 miles, 1,000 hostels, and 90 different countries later, Matt has compiled his favorite stories, experiences, and insights into this travel manifesto. Filled with the color and perspective that only hindsight and self-reflection can offer, these stories get to the real questions at the heart of wanderlust. Travel questions that transcend the basic "how-to," and plumb the depths of what drives us to travel -- and what extended travel around the world can teach us about life, ourselves, and our place in the world. Ten Years a Nomad is for travel junkies, the travel-curious, and anyone interested in what you can learn about the world when you don't have a cable bill for a decade or spend a month not wearing shoes living on the beach in Thailand.

Loving Pablo, Hating Escobar Virginia Vallejo 2018-05 Pablo Escobar was one of the most terrifying criminal minds of the last century. In the decade before his death in 1993, he reigned as the head of a multinational cocaine industry and brought the Colombian state to its knees, killing thousands of politicians, media personalities, police, and unarmed citizens. In the 1980s, Virginia Vallejo was Colombia's most famous television celebrity: a top-rated anchorwoman and a twice-divorced socialite who had been courted by the country's four wealthiest men. In 1982, she interviewed Pablo Escobar on her news program, and soon after, they began a discreet--albeit stormy--romantic relationship. During their five-year affair, Escobar would show Vallejo the vulnerability of presidents, senators, and military leaders seeking to profit from the drug trade. From Vallejo's privileged perspective and her ability to navigate the global corridors of wealth and high society, Escobar gained the insight to master his manipulation of Colombia's powerful elite and media. *Loving Pablo, Hating Escobar* chronicles the birth of Colombia's drug cartels: the kidnappers, the guerilla groups, and the paramilitary organizations. It is, above everything, a great love story--a deep and painful journeythrough a forbidden relationship--that gives us an intimate vision of thelegendary drug baron who left his mark on Colombia, Latin America, the United States, and the world forever.

The New Patriarchs of Digital Capitalism Ben Little 2021-06-24 This book offers an original critique of the billionaire founders of US West Coast tech companies, addressing their collective power, influence, and ideology, their group dynamics, and the role they play in the wider sociocultural and political formations of digital capitalism.

Interrogating not only the founders' political and economic ambitions, but also how their corporations are omnipresent in our everyday lives, the authors provide robust evidence that a specific kind of patriarchal power has emerged as digital capitalism's mode of command. The 'New Patriarchs' examined over the course of the book include: Sergey Brin and Larry Page of Google, Elon Musk of Tesla, Jeff Bezos of Amazon, Mark Zuckerberg of Facebook, and Peter Thiel. We also include Sheryl Sandberg. The book analyses how these (mostly) men legitimate their rapidly acquired power, tying a novel kind of socially awkward but 'visionary' masculinity to exotic forms of shareholding. Drawing on a ten million word digital concordance, the authors intervene in feminist debates on patriarchy, masculinity, and postfeminism, locating the power of the founders as emanating from a specifically racialised structure of oppression tied to imaginaries of the American frontier, the patriarchal household, and settler colonialism. This is an important interdisciplinary contribution suitable for researchers and students across Digital Media, Media and Communication, and Gender and Cultural Studies.

The Female Brain Louann Brizendine, M.D. 2007-08-07 Since Dr. Brizendine wrote *The Female Brain* ten years ago, the response has been overwhelming. This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women's brain function. In *The Female Brain*, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book knowing that they have a lean, mean, communicating machine. Men will develop a serious case of brain envy.

The Impact of Health Insurance in Low- and Middle-Income Countries Maria-Luisa Escobar 2011-01-01 Over the past twenty years, many low- and middle-income countries have experimented with health insurance options. While their plans have varied widely in scale and ambition, their goals are the same: to make health services more affordable through the use of public subsidies while also moving care providers partially or fully into competitive markets. Colombia embarked in 1993 on a fifteen-year effort to cover its entire population with insurance, in combination with greater freedom to choose among providers. A decade later Mexico followed suit with a program tailored to its federal system. Several African nations have introduced new programs in the past decade, and many are testing options for reform. For the past twenty years, Eastern Europe has been shifting from government-run care to insurance-based competitive systems, and both China and India have experimental programs to expand coverage. These nations are betting that insurance-based health care financing can increase the accessibility of services, increase providers' productivity, and change the population's health care use patterns, mirroring the development of health systems in most OECD countries. Until now, however, we have known little about the actual effects of these dramatic policy changes. Understanding the impact of health insurance-based care is key to the public policy debate of whether to extend insurance to low-income populations--and if so, how to do it--or to serve them through other means. Using recent household data, this book presents evidence of the impact of insurance programs in China, Colombia, Costa Rica, Ghana, Indonesia, Namibia, and Peru. The contributors also discuss potential design improvements that could increase impact. They provide innovative insights on improving the evaluation of health insurance reforms and on building a robust knowledge base to guide policy as other countries tackle the health insurance challenge.

A woman learning to claim her own desires and adventures, Suzanne Roberts encounters lightning and landslides, sharks and piranha-infested waters, a nightclub drugging, burning bodies, and brief affairs as she searches for the love of her life and finally herself. Throughout her travels Roberts tries hard not to be a bad tourist, but owing to her cultural blind spots, things don't always go as planned. Fearlessly confessional, shamelessly funny, and wholly unapologetic, Roberts offers a refreshingly honest account of the joys and absurdities of confronting new landscapes and cultures, as well as new versions of herself. Raw, bawdy, and self-effacing, *Bad Tourist* is a journey packed with delights and surprises--both of the greater world and of the mysterious workings of the heart.
